SilverTape™ Super Seal 1100

SilverTape™ Super Seal 1100 is a single-sided transparent acrylic foam tape that has been designed to offer an immediate bond to a wide range of surfaces. The tape contains an ionomer protective film and a new extremely aggressive conformable acrylic adhesive core that provides a high tack with high peel adhesion values. With the tape being closed cell, this tape can be used for sealing applications to create a water tight seal such as bonding over rivets, gaps, and panel seams/joints. Call us today for samples and pricing.

- Replaces messy liquid systems like silicone
- Vibration dampening
- Air and water tight sealing properties
- Excellent long term stability
- Easy to apply and immediate bond
- Resistant to weathering, aging, yellowing (UV influence), chemicals, plasticizers

STRUCTURE	
Adhesive	High Performance Acrylic
Core	Conformable Acrylic
Carrier	Clear Ionomer film
Thickness	1.1 mm (0.043 inch) ± 10%
Density	560kg/m ³ (35lb/ft ³)
Tape Color	Transparent
Liner	Clear PE film liner
TEMPERATURE RESISTANCE	
Minimum	-40°F
Long Term	212°F
Short Term	320°F

Suitable for:

Glass, Stainless Steel, Galvanized Steel, Iron, Anodized Aluminum, Coated Aluminum, all Bare Metals, Wood, Brick, Concrete, Painted Metals*, and most Plastics

*Primer may be needed
